Supplementary Methods

Data visualisation and figure generation

Data processing and visualisation utilised R (version 3.6.3) packages including broom, dplyr, gpclib, ggmap, ggplot2, mapdata, maps, maptools, networkD3, rgdal, rgeos, robustbase and viridis. Data subsetting was performed using the subset() function of 'robustbase' and data reshaping for visualisation involved the use of the group_by() and melt() functions of 'dplyr'. Functions from the ggplot2 R package were used to generate multiple plots including barplots (geom_bar) and UK region map (geom_polygon). The sankeyNetwork() function of the 'networkD3' R package was also used to generate the Sankey plot. The shape (.shp) file for the UK region map was publicly available from the UK Office for National Statistics.

Further acknowledgements

We would like to acknowledge Anna Olsson-Brown for leading in the formation of the emergency reporting network. Daniel Hughes for gaining national approval for the UK CCMP project. Vinton Cheng ensuring the UK CCMP had appropriate UK regulatory approval and clinical governance oversight. Karin Purshouse for forming the Scotland emergency reporting network. Alvin Lee for providing clinical oversight and guidance. Claire Palles, Helen Curley, Archana Sharma-Oates and Roland Arnold in enabling data acquisition and data pre-processing. Simon Hartley and Christopher Middleton, Csilla Varnai for data processing. Ashley Smith for the website.
